

**Special Village Board Meeting
Wednesday, December 11, 2013**

A special Village Board meeting was held on the above date at 7:30 p.m. with the following members present:

PRESENT: Mayor Patricia Abato
Trustee Frank Hagen, Trustee Jo Meegan-Corrigan
Trustee John Meehan, Trustee Matthew Byrne

ALSO PRESENT: Virginia Menschner, Village Clerk
Terry Rice, Village Attorney

ABSENT: None

7:00 P.M. - PUBLIC HEARING - PARKING ALONG BEECH ROAD

The Mayor said our first public hearing is parking along Beech Road. Attorney Rice said the Chief had asked for no parking along Beech Road south of the intersection of Forest Drive. Attorney Rice said he believes the information we had was the local law was written on the west side and now the Chief is recommending the east side. Attorney Rice said before we proceed with the public hearing we should make a motion to amend the draft local law to provide the east side. A motion to amend the draft local law was made by Trustee Meehan, seconded by Trustee Hagen. Upon vote, the motion was carried.

Attorney Rice said that when there is a substantial change in a local law you should renote it. He said he doesn't think this is a substantial change because he thinks anybody who would have been concerned - the advertisement said prohibiting parking along a portion of Beech Road - so he doesn't think there is an issue as far as the adequacy of the notice.

The Mayor asked if anybody would like to speak. Since nobody spoke, a motion to close the public hearing was made by Trustee Meehan, seconded by Trustee Meegan-Corrigan.

VILLAGE OF SUFFERN
LOCAL LAW NO. 13 OF 2013

A LOCAL LAW AMENDING SECTION 254-61 OF THE
CODE OF THE VILLAGE OF SUFFERN
PROHIBITING PARKING ALONG A PORTION OF BEECH ROAD

BE IT ENACTED by the Board of Trustees of the Village of Suffern as follows:

Section 1. Section 254-61, "Schedule XI: Parking

Prohibited At All times," of the

Code of the Village of Suffern is hereby amended by adding after:

[Name of Street]	[Side]	[Location]
Antrim Avenue	West	From Lafayette Avenue to Clinton Place

the following:

[Name of Street]	[Side]	[Location]
Beech Road	East	South of Intersection with Forest Drive

Section 2. This Local Law shall take effect immediately upon filing with the Secretary of State.

A motion adopting the Local Law was made by Trustee Meehan, seconded by Trustee Hagen. Upon vote, the motion was carried.

7:00 P.M. - PUBLIC HEARING - NEW PROVISIONS REGARDING FLOOD DAMAGE PREVENTION:

Attorney Rice said that FEMA has revised regulations in order for any community to participate in the flood insurance program they have to have a local law that complies with the regulations. At the recommendation of the DEC that administers the program for the government rather than piecemeal amend the existing local law they recommend adopting an entirely new local law which is what you have before you. Subsequent to doing the first draft we submitted it to the official at the DEC for their review. There were a number of technical changes that were made and so that was also sent to you with those changes and this is basically the local law that is required by the DEC for the Village's participation. Charles has the esteem title of local flood plain administrator so if you have any technical questions about how the program works he is sure he would be happy to answer them but the local law you have before you is the one that has been approved by the DEC.

Since nobody spoke a motion to close the public hearing was made by Trustee Meehan, seconded by Trustee Byrne. Someone from the audience asked if it could be posted on the website. It was said to them that it is on the website with the agenda.

VILLAGE OF SUFFERN

LOCAL LAW NO. 14 OF 2013

A LOCAL LAW REPEALING CHAPTER 141 OF THE CODE OF THE VILLAGE OF SUFFERN AND REPLACING THE SAME WITH NEW PROVISIONS REGARDING FLOOD DAMAGE PREVENTION AS AUTHORIZED BY THE NEW YORK STATE CONSTITUTION, ARTICLE IX, SECTION 2, AND ENVIRONMENTAL CONSERVATION LAW, ARTICLE 36

BE IT ENACTED by the Board of Trustees of the Village of Suffern as follows:

Section 1. Chapter 141 of the Code of the Village of Suffern is hereby repealed and replaced with the following:

ARTICLE I
STATUTORY AUTHORIZATION AND PURPOSE

§141-1 FINDINGS

The Board of Trustees of the Village of Suffern finds that the potential and/or actual damages from flooding and erosion may be a problem to the residents of the Village of Suffern and that such damages may include: destruction or loss of private and public housing, damage to public facilities, both publicly and privately owned, and injury to and loss of human life. In order to minimize the threat of such damages and to achieve the purposes and objectives hereinafter set forth, this local law is adopted.

§ 141-2 STATEMENT OF PURPOSE

It is the purpose of this local law to promote the public health, safety, and general welfare, and to minimize public and private losses due to flood conditions in specific areas by provisions designed to:

- (1) regulate uses which are dangerous to health, safety and property due to water or erosion hazards, or which result in damaging increases in erosion or in flood heights or velocities;

- (2) require that uses vulnerable to floods, including facilities which serve such uses, be protected against flood damage at the time of initial construction;
- (3) control the alteration of natural floodplains, stream channels, and natural protective barriers which are involved in the accommodation of flood waters;
- (4) control filling, grading, dredging and other development which may increase erosion or flood damages;
- (5) regulate the construction of flood barriers which will unnaturally divert flood waters or which may increase flood hazards to other lands, and;
- (6) qualify and maintain for participation in the National Flood Insurance Program.

§ 141-3 OBJECTIVES

The objectives of this local law are:

- (1) to protect human life and health;
- (2) to minimize expenditure of public money for costly flood control projects;
- (3) to minimize the need for rescue and relief efforts associated with flooding and generally undertaken at the expense of the general public;
- (4) to minimize prolonged business interruptions;
- (5) to minimize damage to public facilities and utilities such as water and gas mains, electric, telephone, sewer lines, streets and bridges located in areas of special flood hazard;
- (6) to help maintain a stable tax base by providing for the sound use and development of areas of special flood hazard so as to minimize future flood blight areas;
- (7) to provide that developers are notified that property is in an area of special flood hazard; and
- (8) to ensure that those who occupy the areas of special flood hazard assume responsibility for

their actions.

ARTICLE II
DEFINITIONS

§ 141-4

Unless specifically defined below, words or phrases used in this local law shall be interpreted so as to give them the meaning they have in common usage and to give this local law its most reasonable application.

"Appeal" means a request for a review of the Local Administrator's interpretation of any provision of this Local Law or a request for a variance.

"Area of shallow flooding" means a designated AO, AH or VO Zone on a community's Flood Insurance Rate Map (FIRM) with a one percent or greater annual chance of flooding to an average annual depth of one to three feet where a clearly defined channel does not exist, where the path of flooding is unpredictable and where velocity flow may be evident. Such flooding is characterized by ponding or sheet flow.

"Area of special flood hazard" is the land in the floodplain within a community subject to a one percent or greater chance of flooding in any given year. This area may be designated as Zone A, AE, AH, AO, A1-A30, A99, V, VO, VE, or VI-V30. It is also commonly referred to as the base floodplain or 100-year floodplain. For purposes of this Local Law, the term "special flood hazard area (SFHA)" is synonymous in meaning with the phrase "area of special flood hazard."

"Base flood" means the flood having a one percent chance of being equaled or exceeded in any given year.

"Basement" means that portion of a building having its floor subgrade (below ground level) on all sides.

"Building" see "Structure"

"Cellar" has the same meaning as "Basement"

"Crawl Space" means an enclosed area beneath the lowest elevated floor, eighteen inches or more in height, which is used to service the underside of the lowest elevated floor. The elevation of the floor of this enclosed area, which may be of soil, gravel, concrete or other material, must be equal to or above the lowest adjacent exterior grade. The enclosed crawl space area shall be properly vented to allow for the equalization of hydrostatic forces which would be experienced during periods of flooding.

"Development" means any man-made change to improved or unimproved real estate, including but not limited to buildings or other structures, mining, dredging, filling, paving, excavation or drilling operations or storage of equipment or materials.

"Elevated building" means a non-basement building (I) built, in the case of a building in Zones A1-A30, AE, A, A99, AO, AH, B, C, X, or D, to have the top of the elevated floor, or in the case of a building in Zones V1-30, VE, or V, to have the bottom of the lowest horizontal structure member of the elevated floor, elevated above the ground level by means of pilings, columns (posts and piers), or shear walls parallel to the flow of the water and (ii) adequately anchored so as not to impair the structural integrity of the building during a flood of up to the magnitude of the base flood. In the case of Zones A1-A30, AE, A, A99, AO, AH, B, C, X, or D, "elevated building" also includes a building elevated by means of fill or solid foundation perimeter walls with openings sufficient to facilitate the unimpeded movement of flood waters. In the case of Zones V1-V30, VE, or V, "elevated building" also includes a building otherwise meeting the definition of "elevated building," even though the lower area is enclosed by means of breakaway walls that meet the federal standards.

"Federal Emergency Management Agency" means the Federal agency that administers the National Flood Insurance Program.

"Flood" or "Flooding" means a general and temporary condition of partial or complete inundation of normally dry land areas from:

- (1) the overflow of inland or tidal waters;
- (2) the unusual and rapid accumulation or runoff of surface waters from any source.

"Flood" or "flooding" also means the collapse or subsidence of land along the shore of a lake or other body of water as a result of erosion or undermining caused by waves or currents of water exceeding anticipated cyclical levels or suddenly caused by an unusually high water level in a natural body of water, accompanied by a severe storm, or by an unanticipated force of nature, such as a flash flood or an abnormal tidal surge, or by some similarly unusual and unforeseeable event which results in flooding as defined in (1) above.

"Flood Boundary and Floodway Map (FBFM)" means an official map of the community published by the Federal Emergency Management Agency as part of a riverine community's

Flood Insurance Study. The FBFM delineates a Regulatory Floodway along water courses studied in detail in the Flood Insurance Study.

"Flood Elevation Study" means an examination, evaluation and determination of the flood hazards and, if appropriate, corresponding water surface elevations, or an examination, evaluation and determination of flood-related erosion hazards.

"Flood Hazard Boundary MAP (FHBM)" means an official map of a community, issued by the Federal Emergency Management Agency, where the boundaries of the areas of special flood hazard have been designated as Zone A but no flood elevations are provided.

"Flood Insurance Rate Map (FIRM)" means an official map of a community, on which the Federal Emergency Management Agency has delineated both the areas of special flood hazard and the risk premium zones applicable to the community.

"Flood Insurance Study" see "flood elevation study."

"Floodplain" or "Flood-prone area" means any land area susceptible to being inundated by water from any source (see definition of "Flooding").

"Floodproofing" means any combination of structural and non-structural additions, changes, or adjustments to structures which reduce or eliminate flood damage to real estate or improved real property, water and sanitary facilities, structures and their contents.

"Floodway" - has the same meaning as "Regulatory Floodway."

"Functionally dependent use" means a use which cannot perform its intended purpose unless it is located or carried out in close proximity to water, such as a docking or port facility necessary for the loading and unloading of cargo or passengers, shipbuilding, and ship repair facilities. The term does not include long-term storage, manufacturing, sales, or service facilities.

"Highest adjacent grade" means the highest natural elevation of the ground surface, prior to construction, next to the proposed walls of a structure.

"Historic structure" means any structure that is:

- (1) listed individually in the National Register of Historic Places (a listing maintained by the Department of the Interior) or preliminarily determined by the Secretary of the Interior as meeting the requirements for individual listing on the National Register;
- (2) certified or preliminarily determined by the Secretary of the Interior as contributing to the historical significance of a registered historic district or a

district preliminarily determined by the Secretary to qualify as a registered historic district;

- (3) individually listed on a state inventory of historic places in states with historic preservation programs which have been approved by the Secretary of the Interior; or
- (4) individually listed on a local inventory of historic places in communities with historic preservation programs that have been certified either:
 - (I) by an approved state program as determined by the Secretary of the Interior or
 - (ii) directly by the Secretary of the Interior in states without approved programs.

"Local Administrator" is the person appointed by the community to administer and implement this local law by granting or denying development permits in accordance with its provisions. This person is often the Building Inspector, Code Enforcement Officer, or employee of an engineering department.

"Lowest floor" means lowest floor of the lowest enclosed area (including basement or cellar). An unfinished or flood resistant enclosure, usable solely for parking of vehicles, building access, or storage in an area other than a basement area is not considered a building's lowest floor; provided, that such enclosure is not built so as to render the structure in violation of the applicable non-elevation design requirements of this Local Law.

"Manufactured home" means a structure, transportable in one or more sections, which is built on a permanent chassis and designed to be used with or without a permanent foundation when connected to the required utilities. The term does not include a "Recreational vehicle."

"Manufactured home park or subdivision" means a parcel (or contiguous parcels) of land divided into two or more manufactured home lots for rent or sale.

"Mean sea level" means, for purposes of the National Flood Insurance Program, the National Geodetic Vertical Datum (NGVD) of 1929, the North American Vertical Datum of 1988 (NAVD88), or other datum, to which base flood elevations shown on a community's Flood Insurance Rate Map are referenced.

"Mobile home" - has the same meaning as "Manufactured home."

"New construction" means structures for which the "start of construction" commenced on or after the effective date of a floodplain management regulation adopted by the community and includes any subsequent improvements to such structure.

"One hundred year flood" or "100-year flood" has the same meaning as "Base Flood."

"Principally above ground" means that at least 51 percent of the actual cash value of the structure, excluding land value, is above ground.

"Recreational vehicle" means a vehicle which is:

- (1) built on a single chassis;
- (2) 400 square feet or less when measured at the largest horizontal projections;
- (3) designed to be self-propelled or permanently towable by a light duty truck; and
- (4) not designed primarily for use as a permanent dwelling but as temporary living quarters for recreational, camping, travel, or seasonal use.

"Regulatory Floodway" means the channel of a river or other watercourse and the adjacent land areas that must be reserved in order to discharge the base flood without cumulatively increasing the water surface elevation more than a designated height as determined by the Federal Emergency Management Agency in a Flood Insurance Study or by other agencies as provided in § 141-15(b) of this Chapter.

"Start of construction" means the date of permit issuance for new construction and substantial improvements to existing structures, provided that actual start of construction, repair, reconstruction, rehabilitation, additional placement, or other improvement is within 180 days after the date of issuance. The actual start of construction means the first placement of permanent construction of a building (including a manufactured home) on a site, such as the pouring of a slab or footings, installation of pilings or construction of columns.

Permanent construction does not include land preparation (such as clearing, excavation, grading, or filling), or the installation of streets or walkways, or excavation for a basement, footings, piers or foundations, or the erection of temporary forms, or the installation of accessory buildings such as garages or sheds not

occupied as dwelling units or not part of the main building. For a substantial improvement, the actual "start of construction" means the first alteration of any wall, ceiling, floor, or other structural part of a building, whether or not that alteration affects the external dimensions of the building.

"Structure" means a walled and roofed building, including a gas or liquid storage tank, that is principally above ground, as well as a manufactured home.

"Substantial damage" means damage of any origin sustained by a structure whereby the cost of restoring the structure to its before damaged condition would equal or exceed 50 percent of the market value of the structure before the damage occurred.

"Substantial improvement" means any reconstruction, rehabilitation, addition, or other improvement of a structure, the cost of which equals or exceeds 50 percent of the market value of the structure before the "start of construction" of the improvement. The term includes structures which have incurred "substantial damage," regardless of the actual repair work performed. The term does not, however, include either:

- (1) any project for improvement of a structure to correct existing violations of state or local health, sanitary, or safety code specifications which have been identified by the local code enforcement official and which are the minimum necessary to assure safe living conditions; or
- (2) any alteration of a "Historic structure," provided that the alteration will not preclude the structure's continued designation as a "Historic structure."

"Variance" means a grant of relief from the requirements of this local law which permits construction or use in a manner that would otherwise be prohibited by this local law.

"Violation" means the failure of a structure or other development to be fully compliant with the community's flood plain management regulations.

ARTICLE III GENERAL PROVISIONS

§ 141-5 LANDS TO WHICH THIS LOCAL LAW APPLIES

This local law shall apply to all areas of special flood hazard within the jurisdiction of the Village of Suffern, Rockland County.

§ 141-6 BASIS FOR ESTABLISHING THE AREAS OF SPECIAL FLOOD HAZARD

The areas of special flood hazard for the Village of Suffern, Community Number 360694, are identified and defined on the following documents prepared by the Federal Emergency Management Agency.

(1) Flood Insurance Rate Map Panel Numbers:

36087C0069G, 36087C0131G, 36087C0132G, 36087C0151G

whose effective date is March 3, 2014, and any subsequent revisions to these map panels that do not affect areas under our community's jurisdiction.

(2) A scientific and engineering report entitled "Flood Insurance Study, Rockland County, New York, All Jurisdictions" dated March 3, 2014.

The above documents are hereby adopted and declared to be a part of this Local Law. The Flood Insurance Study and/or maps are on file at the office of the Village Clerk, 61 Washington Avenue, Suffern, New York 10901.

§ 141-7 INTERPRETATION AND CONFLICT WITH OTHER LAWS

This Local Law includes all revisions to the National Flood Insurance Program through October 27, 1997 and shall supersede all previous laws adopted for the purpose of flood damage prevention.

In their interpretation and application, the provisions of this local law shall be held to be minimum requirements, adopted for the promotion of the public health, safety, and welfare. Whenever the requirements of this local law are at variance with the requirements of any other lawfully adopted rules, regulations, or ordinances, the most restrictive, or that imposing the higher standards, shall govern.

§ 141-8 SEVERABILITY

The invalidity of any section or provision of this local law shall not invalidate any other section or provision thereof.

§ 141-9 PENALTIES FOR NON-COMPLIANCE

No structure in an area of special flood hazard shall hereafter be constructed, located, extended, converted, or altered and no land shall be excavated or filled

without full compliance with the terms of this local law and any other applicable regulations. Any infraction of the provisions of this local law by failure to comply with any of its requirements, including infractions of conditions and safeguards established in connection with conditions of the permit, shall constitute a violation. Any person who violates this local law or fails to comply with any of its requirements shall, upon conviction thereof, be fined no more than \$250 or imprisoned for not more than 15 days or both. Each day of noncompliance shall be considered a separate offense. Nothing herein contained shall prevent the Village of Suffern from taking such other lawful action as necessary to prevent or remedy an infraction. Any structure found not compliant with the requirements of this local law for which the developer and/or owner has not applied for and received an approved variance under Article VI will be declared non-compliant and notification sent to the Federal Emergency Management Agency.

§ 141-10 WARNING AND DISCLAIMER OF LIABILITY

The degree of flood protection required by this local law is considered reasonable for regulatory purposes and is based on scientific and engineering considerations. Larger floods can and will occur on rare occasions. Flood heights may be increased by man-made or natural causes. This local law does not imply that land outside the area of special flood hazards or uses permitted within such areas will be free from flooding or flood damaged. This local law shall not create liability on the part of the Village of Suffern, any officer or employee thereof, or the Federal Emergency Management Agency, for any flood damages that result from reliance on this local law or any administrative decision lawfully made there under.

ARTICLE IV
ADMINISTRATION

§ 141-11 DESIGNATION OF THE LOCAL ADMINISTRATOR

The Director of Public Works is hereby appointed Local Administrator to administer and implement this local law by granting or denying floodplain development permits in accordance with its provisions.

THE FLOODPLAIN DEVELOPMENT PERMIT

§ 141-12 PURPOSE

A floodplain development permit is hereby established for all construction and other development to be undertaken

in areas of special flood hazard in this community for the purpose of protecting its citizens from increased flood hazards and insuring that new development is constructed in a manner that minimizes its exposure to flooding. It shall be unlawful to undertake any development in an area of special flood hazard, as shown on the Flood Insurance Rate Map enumerated in Section 141-6, without a valid floodplain development permit. Application for a permit shall be made on forms furnished by the Local Administrator and may include, but not be limited to: plans, in duplicate, drawn to scale and showing: the nature, location, dimensions, and elevations of the area in question; existing or proposed structures, fill, storage of materials, drainage facilities, and the location of the foregoing.

§ 141-13 FEES

All applications for a floodplain development permit shall be accompanied by an application fee of \$50.00. In addition, the applicant shall be responsible for reimbursing the Village of Suffern for any additional costs necessary for review, inspection and approval of this project. The Local Administrator may require a deposit of no more than \$500.00 to cover these additional costs.

§ 141-14 APPLICATION FOR A PERMIT

The applicant shall provide the following information as appropriate. Additional information may be required on the permit application form.

- (1) The proposed elevation, in relation to mean sea level, of the lowest floor (including basement or cellar) of any new or substantially improved structure to be located in Zones A1-A30, AE or AH, or Zone A if base flood elevation data are available. Upon completion of the lowest floor, the permittee shall submit to the Local Administrator the as-built elevation, certified by a licensed professional engineer or surveyor.
- (2) The proposed elevation, in relation to mean sea level, to which any new or substantially improved non-residential structure will be floodproofed. Upon completion of the floodproofed portion of the structure, the permittee shall submit to the Local Administrator the as-built floodproofed elevation, certified by a professional engineer or surveyor.
- (3) A certificate from a licensed professional engineer

or architect that any utility floodproofing will meet the criteria in Section 141-17(c), UTILITIES.

- (4) A certificate from a licensed professional engineer or architect that any non-residential flood proofed structure will meet the floodproofing criteria in Section 141-17(E), NON-RESIDENTIAL STRUCTURES.
- (5) A description of the extent to which any watercourse will be altered or relocated as a result of proposed development. Computations by a licensed professional engineer must be submitted that demonstrate that the altered or relocated segment will provide equal or greater conveyance than the original stream segment. The applicant must submit any maps, computations or other material required by the Federal Emergency Management Agency (FEMA) to revise the documents enumerated in Section 141-6, when notified by the Local Administrator, and must pay any fees or other costs assessed by FEMA for this purpose. The applicant must also provide assurances that the conveyance capacity of the altered or relocated stream segment will be maintained.
- (6) A technical analysis, by a licensed professional engineer, if required by the Local Administrator, which shows whether proposed development to be located in an area of special flood hazard may result in physical damage to any other property.
- (7) In Zone A, when no base flood elevation data are available from other sources, base flood elevation data shall be provided by the permit applicant for subdivision proposals and other proposed developments (including proposals for manufactured home and recreational vehicle parks and subdivisions) that are greater than either 50 lots or 5 acres.

§ 141-15 DUTIES AND RESPONSIBILITIES OF THE LOCAL ADMINISTRATOR

Duties of the Local Administrator shall include, but not be limited to the following:

A. PERMIT APPLICATION REVIEW

The Local Administrator shall conduct the following permit application review before issuing a floodplain development permit:

- (1) Review all applications for completeness, particularly with the requirements of Section 141-14, APPLICATION FOR A PERMIT, and for compliance with the provisions and standards of this law.
- (2) Review subdivision and other proposed new development, including manufactured home parks to determine whether proposed building sites will be reasonably safe from flooding. If a proposed building site is located in an area of special flood hazard, all new construction and substantial improvements shall meet the applicable standards of Article V, CONSTRUCTION STANDARDS and, in particular, Section 141-16(A) SUBDIVISION PROPOSALS.
- (3) Determine whether any proposed development in an area of special flood hazard may result in physical damage to any other property (e.g., stream bank erosion and increased flood velocities). The Local Administrator may require the applicant to submit additional technical analyses and data necessary to complete the determination.

If the proposed development may result in physical damage to any other property or fails to meet the requirements of Article V, CONSTRUCTION STANDARDS, no permit shall be issued. The applicant may revise the application to include measures that mitigate or eliminate the adverse effects and re-submit the application.

- (4) Determine that all necessary permits have been received from those governmental agencies from which approval is required by State or Federal law.

B. USE OF OTHER FLOOD DATA

- (1) When the Federal Emergency Management Agency has designated areas of special flood hazard on the community's Flood Insurance Rate map (FIRM) but has neither produced water surface elevation data (these areas are designated Zone A or V on the FIRM) nor identified a floodway, the Local Administrator shall obtain, review and reasonably utilize any base flood elevation and floodway data available from a Federal, State or other source,

including data developed pursuant to Section 141-14(7), as criteria for requiring that new construction, substantial improvements or other proposed development meet the requirements of this law.

- (2) When base flood elevation data are not available, the Local Administrator may use flood information from any other authoritative source, such as historical data, to establish flood elevations within the areas of special flood hazard, for the purposes of this law.

C. ALTERATION OF WATERCOURSES

- (1) Notification to adjacent communities and the New York State Department of Environmental Conservation prior to permitting any alteration or relocation of a watercourse, and submittal of evidence of such notification to the Regional Administrator, Region II, Federal Emergency Management Agency.
- (2) Determine that the permit holder has provided for maintenance within the altered or relocated portion of said watercourse so that the flood carrying capacity is not diminished.

D. CONSTRUCTION STAGE

- (1) In Zones A1-A30, AE and AH, and also Zone A if base flood elevation data are available, upon placement of the lowest floor or completion of floodproofing of a new or substantially improved structure, obtain from the permit holder a certification of the as-built elevation of the lowest floor or floodproofed elevation, in relation to mean sea level. The certificate shall be prepared by or under the direct supervision of a licensed land surveyor or professional engineer and certified by same. For manufactured homes, the permit holder shall submit the certificate of elevation upon placement of the structure on the site. A certificate of elevation must also be submitted for a recreational vehicle if it remains on a site for 180 consecutive days or longer (unless it is fully licensed and ready for highway use).
- (2) Any further work undertaken prior to submission and approval of the certification

shall be at the permit holder's risk. The Local Administrator shall review all data submitted. Deficiencies detected shall be cause to issue a stop work order for the project unless immediately corrected.

E. INSPECTIONS

The Local Administrator and/or the developer's engineer or architect shall make periodic inspections at appropriate times throughout the period of construction in order to monitor compliance with permit conditions and enable said inspector to certify, if requested, that the development is in compliance with the requirements of the floodplain development permit and/or any variance provisions.

F. STOP WORK ORDERS

- (1) The Local Administrator shall issue, or cause to be issued, a stop work order for any floodplain development found ongoing without a development permit. Disregard of a stop work order shall subject the violator to the penalties described in Section 141-9 of this Chapter.
- (2) The Local Administrator shall issue, or cause to be issued, a stop work order for any floodplain development found non-compliant with the provisions of this law and/or the conditions of the development permit. Disregard of a stop work order shall subject the violator to the penalties described in Section 141-9 of this Chapter.

G. CERTIFICATE OF COMPLIANCE

- (1) In areas of special flood hazard, as determined by documents enumerated in Section 141-6, it shall be unlawful to occupy or to permit the use or occupancy of any building or premises, or both, or part thereof hereafter created, erected, changed, converted or wholly or partly altered or enlarged in its use or structure until a certificate of compliance has been issued by the Local Administrator stating that the building or land conforms to the requirements of this local law.
- (2) A certificate of compliance shall be issued by

the Local Administrator upon satisfactory completion of all development in areas of special flood hazard.

- (3) Issuance of the certificate shall be based upon the inspections conducted as prescribed in Section 141-15(E), INSPECTIONS, and/or any certified elevations, hydraulic data, floodproofing, anchoring requirements or encroachment analyses which may have been required as a condition of the approved permit.

H. INFORMATION TO BE RETAINED

The Local Administrator shall retain and make available for inspection copies of the following:

of compliance;

- (1) Floodplain development permits and certificates
- (2) Certifications of as-built lowest floor elevations of structures, required pursuant to Sections 141-15(D) (1) and (2), and whether or not the structures contain a basement;
- (3) Floodproofing certificates required pursuant to Section 141-15(D), and whether or not the structures contain a basement;
- (4) Variances issued pursuant to Article VI, VARIANCE PROCEDURES; ,
- (5) Notices required under Section 141-15(c), ALTERATION OF WATERCOURSES.

ARTICLE V
CONSTRUCTION STANDARDS

§ 141-16 GENERAL STANDARDS

The following standards apply to new development, including new and substantially improved structures, in the areas of special flood hazard shown on the Flood Insurance Rate Map designated in Section 141-6.

A. SUBDIVISION PROPOSALS

The following standards apply to all new subdivision proposals and other proposed development in areas of special flood hazard

(including proposals for manufactured home and recreational vehicle parks and subdivisions):

- (1) Proposals shall be consistent with the need to minimize flood damage;
- (2) Public utilities and facilities such as sewer, gas, electrical and water systems shall be located and constructed so as to minimize flood damage; and,
- (3) Adequate drainage shall be provided to reduce exposure to flood damage.

B. ENCROACHMENTS

- (1) Within Zones A1-A30 and AE, on streams without a regulatory floodway, no new construction, substantial improvements or other development (including fill) shall be permitted unless:
 - (i) the applicant demonstrates that the cumulative effect of the proposed development, when combined with all other existing and anticipated development, will not increase the water surface elevation of the base flood more than one foot at any location, or,
 - (ii) the Village of Suffern agrees to apply to the Federal Emergency Management Agency (FEMA) for a conditional FIRM revision, FEMA approval is received and the applicant provides all necessary data, analyses and mapping and reimburses the Village of Suffern for all fees and other costs in relation to the application. The applicant must also provide all data, analyses and mapping and reimburse the Village of Suffern for all costs related to the final map revision.
- (2) On streams with a regulatory floodway, as shown on the Flood Boundary and Floodway Map or the Flood Insurance Rate Map adopted in Section 141-6, no new construction, substantial improvements or other development in the floodway (including fill) shall be permitted unless:
 - (i) a technical evaluation by a licensed professional engineer shows that such an

encroachment shall not result in any increase in flood levels during occurrence of the base flood, or,

- (ii) the Village of Suffern agrees to apply to the Federal Emergency Management Agency (FEMA) for a conditional FIRM and floodway revision, FEMA approval is received and the applicant provides all necessary data, analyses and mapping and reimburses the Village of Suffern for all fees and other costs in relation to the application. The applicant must also provide all data, analyses and mapping and reimburse the Village of Suffern for all costs related to the final map revisions.

§ 141-17 STANDARDS FOR ALL STRUCTURES

The following standards apply to new development, including new and substantially improved structures, in the areas of special flood hazard shown on the Flood Insurance Rate Map designated in Section 141-6.

A. ANCHORING

New structures and substantial improvement to structures in areas of special flood hazard shall be anchored to prevent flotation, collapse, or lateral movement during the base flood. This requirement is in addition to applicable State and local anchoring requirements for resisting wind forces.

B. CONSTRUCTION MATERIALS AND METHODS

- (1) New construction and substantial improvements to structures shall be constructed with materials and utility equipment resistant to flood damage.
- (2) New construction and substantial improvements to structures shall be constructed using methods and practices that minimize flood damage.
- (3) For enclosed areas below the lowest floor of a structure within Zones A1-A30, AE or AH, and also Zone A if base flood elevation data are available, new and substantially improved structures shall have fully enclosed areas

below the lowest floor that are useable solely for parking of vehicles, building access or storage in an area other than a basement and which are subject to flooding, designed to automatically equalize hydrostatic flood forces on exterior walls by allowing for the entry and exit of flood waters. Designs for meeting this requirement must either be certified by a licensed professional engineer or architect or meet or exceed the following minimum criteria:

- (i) a minimum of two openings having a total net area of not less than one square inch for every square foot of enclosed area subject to flooding; and
- (ii) the bottom of all such openings no higher than one foot above the lowest adjacent finished grade.

Openings may be equipped with louvers, valves, screens or other coverings or devices provided they permit the automatic entry and exit of floodwaters. Enclosed areas subgrade on all sides are considered basements and are not permitted.

C. UTILITIES

- (1) New and replacement electrical equipment, heating, ventilating, air conditioning, plumbing connections, and other service equipment shall be located at least two feet above the base flood elevation or be designed to prevent water from entering and accumulating within the components during a flood and to resist hydrostatic and hydrodynamic loads and stresses. Electrical wiring and outlets, switches, junction boxes and panels shall be elevated or designed to prevent water from entering and accumulating within the components unless they conform to the appropriate provisions of the electrical part of the Building Code of New York State or the Residential Code of New York State for location of such items in wet locations.
- (2) New and replacement water supply systems shall be designed to minimize or eliminate infiltration of flood waters into the system;

- (3) New and replacement sanitary sewage systems shall be designed to minimize or eliminate infiltration of flood waters. Sanitary sewer and storm drainage systems for buildings that have openings below the base flood elevation shall be provided with automatic backflow valves or other automatic backflow devices that are installed in each discharge line passing through a building's exterior wall; and,
- (4) On-site waste disposal systems shall be located to avoid impairment to them or contamination from them during flooding.

D. RESIDENTIAL STRUCTURES

The following standards apply to new and substantially improved residential structures located in areas of special flood hazard, in addition to the requirements in Section 141-16(A), SUBDIVISION PROPOSALS, and Section 141-16(B), ENCROACHMENTS, and Section 141-17, STANDARDS FOR ALL STRUCTURES.

- (1) Within Zones A1-A30, AE and AH and also Zone A if base flood elevation data are available, new construction and substantial improvements shall have the lowest floor (including basement) elevated to or above two feet above the base flood elevation.
- (2) Within Zone A, when no base flood elevation data are available, new construction and substantial improvements shall have the lowest floor (including basement) elevated at least three feet above the highest adjacent grade.
- (3) Within Zone AO, new construction and substantial improvements shall have the lowest floor (including basement) elevated above the highest adjacent grade at least as high as two feet above the depth number specified in feet on the community's Flood Insurance Rate Map enumerated in § 141-6 (at least two feet if no depth number is specified).
- (4) Within Zones AH and AO, adequate drainage paths are required to guide flood waters around and away from proposed structures on slopes.

E. NON-RESIDENTIAL STRUCTURES

The following standards apply to new and substantially

improved commercial, industrial and other non-residential structures located in areas of special flood hazard, in addition to the requirements in Section 141-16(A), SUBDIVISION PROPOSALS, and Section 141-16(B), ENCROACHMENTS, and Section 141-17, STANDARDS FOR ALL STRUCTURES.

- (1) Within Zones A1-A30, AE and AH, and also Zone A if base flood elevation data are available, new construction and substantial improvements of any non-residential structure shall either:
 - (i) have the lowest floor, including basement or cellar, elevated to or above two feet above the base flood elevation; or
 - (ii) be floodproofed so that the structure is watertight below two feet above the base flood elevation, including attendant utility and sanitary facilities, with walls substantially impermeable to the passage of water. All structural components located below the base flood level must be capable of resisting hydrostatic and hydrodynamic loads and the effects of buoyancy.
- (2) Within Zone AO, new construction and substantial improvements of non-residential structures shall:
 - (i) have the lowest floor (including basement) elevated above the highest adjacent grade at least as high as two feet above the depth number specified in feet on the community's FIRM (at least two feet if no depth number is specified), or
 - (ii) together with attendant utility and sanitary facilities, be completely floodproofed to that level to meet the floodproofing standard specified in sub-section 141-17(E)(1)(ii)
- (3) If the structure is to be floodproofed, a licensed professional engineer or architect shall develop and/or review structural design, specifications, and plans for construction. A Floodproofing Certificate or other certification shall be provided to the Local Administrator that certifies the design and methods of construction are in accordance with accepted standards of practice for meeting the provisions of Section 141.17(E)(1)(ii), including the specific elevation (in relation to mean sea level) to which the structure is to be

floodproofed.

- (4) Within Zones AH and AO, adequate drainage paths are required to guide flood waters around and away from proposed structures on slopes.
- (5) Within Zone A, when no base flood elevation data are available, the lowest floor (including basement) shall be elevated at least three feet above the highest adjacent grade.

F. MANUFACTURED HOMES AND RECREATIONAL VEHICLES

The following standards in addition to the standards in Section 141-16, GENERAL STANDARDS, and Section 141-17, STANDARDS FOR ALL STRUCTURES apply, as indicated, in areas of special flood hazard to manufactured homes and to recreational vehicles which are located in areas of special flood hazard.

- (1) Recreational vehicles placed on sites within Zones A1-A30, AE and AH shall either:
 - (i) be on site fewer than 180 consecutive days,
 - (ii) be fully licensed and ready for highway use, or
 - (iii) meet the requirements for manufactured homes in sections 141-17(F)(2), (3) and (4).

A recreational vehicle is ready for highway use if it is on its wheels or jacking system, is attached to the site only by quick disconnect type utilities and security devices and has no permanently attached additions.

- (2) A manufactured home that is placed or substantially improved in Zones A1-A30, AE and AH shall be elevated on a permanent foundation such that the lowest floor is elevated to or above two feet above the base flood elevation and is securely anchored to an adequately anchored foundation system to resist flotation, collapse and lateral movement.
- (3) Within Zone A, when no base flood elevation data are available, new and substantially improved manufactured homes shall be elevated such that the manufactured home chassis is supported by reinforced piers or other foundation elements of at least equivalent strength that are no less than 36 inches in height above grade and are securely anchored to an adequately anchored foundation

system to resist flotation, collapse or lateral movement.

- (4) Within Zone AO, the floor shall be elevated above the highest adjacent grade at least as high as two feet above the depth number specified on the Flood Insurance Rate Map enumerated in Section 141-6 (at least two feet if no depth number is specified).

ARTICLE VI
VARIANCE PROCEDURE

§ 141-18 APPEALS BOARD

- (1) The Zoning Board of Appeals as established by the Village of Suffern shall hear and decide appeals and requests for variances from the requirements of this local law.
- (2) The Zoning Board of appeals shall hear and decide appeals when it is alleged there is an error in any requirement, decision, or determination made by the Local Administrator in the enforcement or administration of this local law.
- (3) Those aggrieved by the decision of the Zoning Board of Appeals may appeal such decision to the Supreme Court pursuant to Article 78 of the Civil Practice Law and Rules.
- (4) In passing upon such applications, the Zoning Board of Appeals, shall consider all technical evaluations, all relevant factors, standards specified in other sections of this local law and:
 - (i) the danger that materials may be swept onto other lands to the injury of others;
 - (ii) the danger to life and property due to flooding or erosion damage;
 - (iii) the susceptibility of the proposed facility and its contents to flood damage and the effect of such damage on the individual owner;
 - (iv) the importance of the services provided by the proposed facility to the community;
 - (v) the necessity to the facility of a waterfront location, where applicable;

- (vi) the availability of alternative locations for the proposed use which are not subject to flooding or erosion damage;
 - (vii) the compatibility of the proposed use with existing and anticipated development;
 - (viii) the relationship of the proposed use to the comprehensive plan and floodplain management program of that area;
 - (ix) the safety of access to the property in times of flood for ordinary and emergency vehicles;
 - (x) the costs to local governments and the dangers associated with conducting search and rescue operations during periods of flooding;
 - (xi) the expected heights, velocity, duration, rate of rise and sediment transport of the flood waters and the effects of wave action, if applicable, expected at the site; and
 - (xii) the costs of providing governmental services during and after flood conditions, including search and rescue operations, maintenance and repair of public utilities and facilities such as sewer, gas, electrical, and water systems and streets and bridges.
- (5) Upon consideration of the factors of Section 141-18(4) and the purposes of this local law, the Zoning Board of Appeals may attach such conditions to the granting of variances as it deems necessary to further the purposes of this local law.
 - (6) The Local Administrator shall maintain the records of all appeal actions including technical information and report any variances to the Federal Emergency Management Agency upon request.

§ 141-19 CONDITIONS FOR VARIANCES

- (1) Generally, variances may be issued for new construction and substantial improvements to be erected on a lot of one-half acre or less in size contiguous to and surrounded by lots with existing structures constructed below the base flood level, providing items (i-xii) in Section 141-18(4) have been fully considered. As the lot size increases beyond the one-half acre, the technical justification required for issuing the variance

increases.

- (2) Variances may be issued for the repair or rehabilitation of historic structures upon determination that:
 - (i) the proposed repair or rehabilitation will not preclude the structure's continued designation as a "Historic structure," and
 - (ii) the variance is the minimum necessary to preserve the historic character and design of the structure.
- (3) Variances may be issued by a community for new construction and substantial improvements and for other development necessary for the conduct of a functionally dependent use provided that:
 - (i) the criteria of subparagraphs 1, 4, 5, and 6 of this Section are met; and
 - (ii) the structure or other development is protected by methods that minimize flood damages during the base flood and create no additional threat to public safety.
- (4) Variances shall not be issued within any designated floodway if any increase in flood levels during the base flood discharge would result.
- (5) Variances shall only be issued upon a determination that the variance is the minimum necessary, considering the flood hazard, to afford relief.
- (6) Variances shall only be issued upon receiving written justification of:
 - (i) a showing of good and sufficient cause;
 - (ii) a determination that failure to grant the variance would result in exceptional hardship to the applicant; and
 - (iii) a determination that the granting of a variance will not result in increased flood heights, additional threats to public safety, extraordinary public expense, create nuisances, cause fraud on or victimization of the public or conflict with existing local laws or ordinances.

- (7) Any applicant to whom a variance is granted for a building with the lowest floor below the base flood elevation shall be given written notice over the signature of a community official that:
- (i) the issuance of a variance to construct a structure below the base flood level will result in increased premium rates for flood insurance up to amounts as high as \$25 for \$100 of insurance coverage; and
 - (ii) such construction below the base flood level increases risks to life and property.

Such notification shall be maintained with the record of all variance actions as required in Section 141-15(H).

Section 2. This local law shall be effective immediately upon filing with the Secretary of State.

A motion adopting the local law was made by Trustee Meehan, seconded by Trustee Byrne. Upon vote, the motion was carried.

The Mayor said our next item is the Orange Avenue developer has requested to postpone coming before us as they wish to come back with a new proposal. They have asked to postpone it to a date certain which is in February - February 3. The Mayor asked for a motion to continue the public hearing until February 3. A motion was made by Trustee Meehan, seconded by Trustee Meegan-Corrigan. Upon vote, the motion was carried.

Attorney Rice said we have a memo here from Building Inspector Steve Conlee: the Building Department has requested that the Village of Suffern Fire Inspector/Assistant Fire Inspector be authorized to issue a summons for illegal parking in a fire zone - parking any vehicle within 15 feet of any fire hydrant or fire department connection. So that has to be recorded in the Village Code. So if you would like to move on that you should set a public hearing for the January meeting. A motion to set a public hearing for January 6 at 7:35 p.m. was made by Trustee Meehan, seconded by Trustee Meegan-Corrigan. Upon vote, the motion was carried.

Appointment of Timothy McInerney as Alternate Member to Planning Board:

The Mayor said she was appointing Timothy McInerney as an alternate member to the Planning Board. A motion confirming the appointment was made by Trustee Meegan-Corrigan, seconded by Trustee Meehan. Upon vote, the motion was carried.

Approval of Proposal - DPW:

Mr. Charles Sawicki requested authorization to accept the lowest cost proposal for the heating and ventilating system for the WWTP process building. This proposal is from Landauer Mechanical Corp, Nanuet, New York in the amount of \$30,800. This cost would be charged to the WWTP capital project account. Trustee Meehan asked if there were any other bidders. Mr. Sawicki said yes they sent out an RFP to four contractors and he was the low bidder. Trustee Meehan said okay. A motion awarding the bid was made by Trustee Meehan, seconded by Trustee Byrne.

AYES: Mayor Patricia Abato
Trustee Frank Hagen, Trustee Jo Meegan-Corrigan
Trustee John Meehan, Trustee Matthew Byrne

NOES: None

ABSENT: None

A motion to go into executive session to discuss personnel was made by Trustee Meegan-Corrigan, seconded by Trustee Meehan. Upon vote, the motion was carried.

As the Village Board was getting ready to go into executive session, Mayor Abato saw Ramapo Town Board member Daniel Friedman, who asked to address the Board and the residents. Mayor Abato reopened the meeting.

The Mayor said that as people may have read in the newspaper, Mr. Friedman is on tour of different municipalities and we got picked as first on his list but there were a lot of different things going on the night of our regular meeting. Attorney Rice said just for the record we are back in the regular session.

Mr. Friedman said he just came from midtown - he left at 4:40 and he just got here. Mayor Abato said she is glad that he made it. Mr. Friedman thanked the Mayor for the introduction. And thanks for the opportunity to speak and for reopening the meeting. He said he is going around to every village in the town. He said we have twelve villages in our town and he is representing just his own office. He is not representing the Town of Ramapo or anybody. The purpose of his going to every village is to discuss the issues that the town has been working on and also to foster a closer dialogue between the town and our villages which he thinks really needs some improvement. If there are any local issues that can be addressed as he has done in other villages he would be more than happy to. That is the purpose. He said that recently they passed their town budget for 2014. Initially the proposed tax increase was 24.84% on the town-wide line. That is the line that every resident of Ramapo pays. There is an additional line for residents in unincorporated Ramapo if you receive the services that villages provide. The unincorporated tax rate was said to fall by 13%. So there was a great inequity. That was the first thing that he sought to try and

rectify. With budget cuts and reworking the budget we were able to bring the unincorporated tax up and the incorporated tax down so that they were both 4.49%. He said he doesn't believe that someone should be overtaxed because of where in the town they choose to live and this was something that was going to hurt residents of every village and obviously including Suffern. There was also some legislation that he proposed with the budget that would prevent, it is what he calls the deficit prevention legislation. He said they are going to be receiving regular monthly and in some cases bimonthly reports on expenditures so that they can have a more closely watched - they could stay on top of their finances in a much better and responsible way than has been done in the past. He thinks that when they look at the numbers - literally every pay period they are going to get a report. Things are going above the budget and they are going to create a deficit which is going to lead to more tax increases and more problems we need to pull back in the middle of the year. So they have given the Town Board with this legislation the opportunity to halt and prevent deficits in the middle of the year. That's what they have been able to do in the budget. He said if there were any questions or any issues that Suffern has - he does want to say that Chief Osborn is here - he said he said it on Facebook today and he will say it again. He said he really wants to applaud the incredible work first that he does with the police department and also the work that is done by him and by the Mayor and the Board to improve the community by doing the toy drive and all the different things that are done throughout the year - the Crotty-Kronkowski Foundation - all of that work, the incredible work for the community and it is a great example to people all over this county he believes. He asked if there were any questions that the Board has or any issues that he can help. The Mayor said she had one comment. She said she really applauds the effort that he is reaching out to the different villages and she thinks it is really important that we have a good communication in place since we do rely on each other for so much. Unfortunately it has not been the case here in the Village of Suffern and there has been a very big lack of communication with the town and she thinks she can speak for the Board members who have remained on the Board that we have reached out on several occasions to have good communication with the Town of Ramapo and most of our communication has gone unanswered. So we would be very receptive and very, very happy to have a better communication system in place so that we can better able towards each other and be more cohesive in our efforts. So if you have any time or you can give any suggestion as to how we could accomplish that, that would be wonderful. We have a lot of issues going on here in the Village that we really could use the assistance from the town on and we feel like the door has been closed on us. And we would like to have that door reopened. So we are very, very much in favor of taking the first step forward to say that we would like to begin the process. She said she didn't know if he had any thoughts. Mr. Friedman said he certainly wouldn't want us to feel like the doors are closed. Like he said, they need to be opened a little more and that is why he is doing

this. He said he can bring things and put them on the agenda and bring them to the attention of the town board but he can also resolve issues that don't necessarily need the full town board's approval. There are a lot of different services and things. We rely on each other and we work together. Suffern is a full-service Village so less than perhaps other villages in Suffern but he can understand. If you want to - we can get together at any time. He said we have his cell phone. The Mayor said that would be wonderful. Mr. Friedman said anybody can call him at anytime. If you think there are some things that can be done without that much work - that it can be done pretty quickly - if you want to say them he will put them down and take care of them right away. The Mayor said she thinks we should sit down and go through because she thinks it's a lot of different areas that need to be addressed. A lot of different issues. She said she knows that Jack and Jo have worked tirelessly on trying to keep a good relationship with the town on different issues so if we could sit down and just take some time and kind of go through and kind of show you what's been going on she thinks he would get a better understanding on what we have been going through and where we are as a Board. We have Matt and Frank here who have come on board who she is sure could use some updating on what has been going on and she knows that the same as the Board wants a good relationship. Mr. Friedman said okay. He said he does want to welcome them as well and obviously to you for making history here in Suffern. The Mayor thanked him. He said it really is a great statement about Suffern and where we are at. And he is really interested in working with the Board members - the new ones and the not so new ones. And we are all working together. We serve the same people. There is no reason why that door can't be fully opened. He said he will call the Mayor tomorrow morning and they will set up a meeting. The Mayor said excellent. The Mayor thanked him for coming by.

After Mr. Friedman spoke, the Board went into executive session at 7:32 p.m.
